Lone Star

HDL08110C Lone Star

The Birkin Stud is situated in Marquard, Free State and have climbed into the Simbra breed with tremendous enthusiasm and are breeding and building a fine Stud. Their main herd sire is Exelsus Lone Star who is breeding great calves. Lone Star is bred from our former champion cow Exelsus Santi. Lone Star is throwing typical simbra type and small calves. Lone Star achieved a 100% conception in 2012. This proven herd sire will be marketed to a good home at the end of 2012/13 breeding season

HDL1034C Prairie

Birkin Stud's latest herd sire is Exelsus Prairie HDL1034C who is a scurred PRR Prevail son bred from one of our best young cows Exelsus Icy HL06142C. We used this bull at a year old and have some beautiful calves. Prairie's sire PRR Prevail is a homozygous polled bull and all Prairie's calves have so far been polls.

Vicky's Birkin stud, and her partner Clive van den Berg have also bought six open heifers from our Excelsus breeding herds. They are bred from Diana's Dynamite, Exelsus Lansreac, Exelsus Stoney and Exelsus Galen. These should breed handsomely with Prairie. The Lone Star calves will also breed well with Prairie matching their simbra type, length and presence with Prairies muscling, poll, beautiful hair quality and cherry red colour.

It is always a pleasure talking and walking with passionate stud breeders where their cattle are their pride and joy.

Hats off to the Birkin Stud team
