Diana's Simbra Stud: A Tribute to Dr. Otto Herrigel

Herd Consultation Photos 13-5-13

The Diana's Simbra stud has over the years become synonymous with breeding top quality cattle bred with unwavering dedication and committed to excellence. Only top quality females were retained and only the very best young bulls were sold to stud and commercial clients.

Dr. Herrigel and Karin used a very successful AI and bulling program to create new bloodlines for themselves often breeding a top stud bull using very few straws. The herd fertility was exemplary winning the Simdex herd of the year on numerous occasions.

The 2011 Statistics read as follows

74 females with 2 or more calvings Simbradex 103 and ICP378

25 cows with 1 or more stars to their name.

Excelsus Landgoed has always rated this stud as one of the very best.
